

Please leave my satellite radio alone. Congress already screwed up free radio by allowing the large broadcasting companies to buy up more than one station per market thus ensuring that I can listen to the same ten songs they play in Chicago, get played over and over again Beecher WI and again Houghton MI. When I listen to weather and traffic. I shouldn't have to listen 20 minutes of commercials for stuff I'm not going to buy anyway. Go screw up something else leave my radio alone.
